Building character
through uncommon
opportunities

PRESIDENT'S MESSAGE

The Juniata experience is second to none in providing quality education to our undergraduates.

Dear Friends,

Juniata is fortunate to have the support of the many alumni and friends who share our dream of making this College even stronger and more vibrant.

We witnessed that support throughout the April weekend when we celebrated the contributions of Juniata women. The energy and enthusiasm generated that weekend extended to all corners of the campus. The women, and men, who participated in the weekend came away with a fuller understanding and stronger appreciation for the vision of our founders, who created an institution where everyone would have equal access to quality education. The weekend is featured in an article beginning on page 8.

We witness that support in the classrooms and corridors of Juniata. The Juniata experience is second to none in providing quality education to our undergraduates. The breadth of opportunities available today to our students is staggering. Where our students choose to invest their time in four years is very difficult, primarily because there are so many options open to them as you will see in this edition's lead story.

We also witness continued support from many groups and organizations. For example, The Kresge Foundation, recently extended to Juniata an \$800,000 challenge grant in support of the William J. von Liebig Center for Science.

This is the fifth and largest Kresge grant Juniata has received. As outlined in the following article, to successfully meet the challenge, we must complete the fundraising goals for the von Liebig Center and also for the college endowment. To meet the terms of the Kresge Foundation grant, we must raise \$6,451,479 in matching gifts and pledges by September 30, 2002.

To be successful, we are counting on the support of our alumni and friends. I'm confident we will succeed just as we did on four prior Kresge challenges.

Warm Regards,

A handwritten signature in black ink, appearing to be 'TK' with a stylized flourish.

Thomas R. Kepple Jr.
President

Juniata College Magazine is published quarterly by Juniata College. Department of Advancement and Marketing and is distributed free of charge to alumni and friends of Juniata College. Postmaster and others, please send change-of-address correspondence to: Alumni Relations, 1700 Moore St., Huntingdon, PA 16652-2196. Juniata College Magazine can accept no responsibility for unsolicited contributions of artwork, photography, or articles. Juniata College, as an educational institution and employer, values equality of opportunity and diversity. The College is an independent, privately supported co-educational institution committed to providing a liberal arts education to qualified students regardless of sex, race, color, religion, national origin, ancestry, marital status, sexual orientation, or disability. Its policies comply with requirements of Title VIII of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, and all other applicable federal, state, and local statutes, regulations and guidelines. We welcome letters from readers. Write to us at: Juniata College Magazine, 1700 Moore Street, Huntingdon, PA 16652-2196 or e-mail us at gildead@juniata.edu. Letters to the editor will be considered for publication when the writer includes name, address and daytime telephone number. We publish the letter writer's name; addresses are not printed. Letters may be edited for clarity and length.

2 So What Did You Do in College?

Juniata students have the opportunity to do more in their four years on campus than some undergraduates accomplish in a lifetime. The College offers unique ways to learn through research, service and internships.

10 Building a Foundation for Science

As the William J. von Liebig Center for Science takes shape on the Juniata College campus, learn what the state-of-the-art facility means to the students and faculty who will be using it.

12 A Celebration of Juniata Women

Sharing memories, finding common ground and celebrating the enduring legacy of Juniata's coeducational mission is a highlight of the College's 125 years of higher education.

So What Did You Do in College?

Duane Gaudrey (left) and Beth Rivers (right) are working on a project sponsored by the Juniata College chapter of Habitat for Humanity. Habitat offers unique opportunities for students to become involved in the life of the local community.

Juniata packs many experiences into four years.

When it comes right down to it, the common college experience — dorms, classes, activities, sports — remains the same on campuses from Maine to Hawaii. However, when it comes to the uncommon undergraduate experience, that's where Juniata College separates from the pack. Juniata students speak of opportunities and experiences ranging from forming a new student club, spearheading a complicated science research project and interacting with authors, academics and entertainers as the rule, rather than the exception, on campus.

Leslie Slingsby '01, a senior from Perkasie, Pa. studying social work, sees Juniata as a campus of unlimited opportunity. She transferred to Juniata her sophomore year after feeling lost in the crowd at the University of Pittsburgh. "In the city, you keep your eyes down and don't say anything to anybody. The first week I was here, I was asking myself 'Do I say hello to everybody who says hello, or just the people I know?' I couldn't believe it."

Slingsby's slate of experiences reads like a case study from "In Search of Excellence." So far, she has started a Juniata chapter of Phi Alpha, the honorary society for social work, organized the college's Take Back the Night activities over the past two years, and worked as an intern in social work at Huntingdon Area High School.

Learning opportunities emerge in and out of Juniata classrooms as well. Clay Lutz '03, a junior from Altoona studying environmental science, is hip-deep in a research project studying the nesting habits and habitat of the map turtle, a never-dwelling reptile about the size of a dinner plate. In a project funded by the Pennsylvania Department of Transporta-

"This is a once-in-a-lifetime opportunity."
Clay Lutz '03

Juniata sophomore Clay Lutz, left, and Brumbaugh Science Center manager Roy Nagle check a wire-mesh cage used to protect map turtle nests from predators. The turtle nests dot a stretch of highway along Route 522 near Mount Union. The chain-link fence at right prevents adult turtles from clambering onto the highway in search of their previous nesting sites.

tion, Lutz, senior Tim Eneedy '01 from Portage, Andy Pyle '03, a junior from Thompsonstown, and Roy Nagle, manager of the Brumbaugh Science Center, have teamed to protect and research a population of turtles that has been rarely studied.

Lutz and Eneedy spent last summer monitoring turtle nests and tracking the migratory habits of map turtles using radio transmitters attached to three adult turtles. Lutz has signed on for another summer of turtle study in 2001. "This is a once-in-a-lifetime opportunity," Lutz says, simply.

The sheer numbers of students involved in activities on campus and in the surrounding community make the stereotype of slacker college students seem as outdated as a zoot suit. From the moment a freshman steps onto the Juniata campus, opportunities abound to spend a semester or an entire year abroad, perform in a play, compete in college or intramural sports, volunteer in the community, or work with local and national businesses. Indeed, it almost seems as if a student would

have to willfully avoid human contact to spend four years here without participating in a unique, life-broadening experience.

There are 84 student-run organizations, most of which are actively recruiting for members. "I joined six or eight clubs the first month I was here," says Diana Goodley,

'01, a senior from Brownstown, Pa. studying social work. Goodley is in her second year as co-president of Habitat for Humanity. She's traveled on spring club trips to build housing in North Carolina, Columbus, Ga., Miami, Fla. and Beattyville, Ky

Students also can find opportunities within the Huntingdon community. Johnathan White '01, a senior from Ashland, Ohio studying environmental science and ecology, began working for the Salvation Army program Ark of Learning as a freshman work-study student and now is director of the tutoring program for area children. "This has allowed me to extend beyond the Juniata community to get involved with other people," he says.

For Jeremy Henderson '01, a senior from Bolivar, Pa., studying political relations and Spanish, becoming involved with the Conflict Resolution Center in Oller Center changed not only his outlook on life but also his career interest. Henderson is now a trained mediator and has participated in at least six official conflict resolutions between students. "All my preparations in college have been aimed at going to law school," Henderson says. "Now I think I'd like to specialize in mediation. The opportunities here are at your fingertips."

Opportunities also are close at hand for students to see and interact with speakers and lecturers from a variety of backgrounds and disciplines. In the 2000-2001 academic year, more than 100 guest lecturers or panelists spoke on campus. They included David Brooks, author of "Bobos in Paradise;" Max Weinberg, bandleader for Conan O'Brien; James Merrell, prize-winning historian, and theologian John Haught, author of "Darwin After God."

The College's performing arts series and the Juniata College Museum of Art expose students to art, music, dance and theatre from other cultures. Over the past four years Juniata

**"This has allowed
me to extend
beyond the Juniata
community to
get involved with
other people."**

Johnathan White '01

has hosted such ensembles as Philadanco, an African-American dance company, concert pianist Awadagin Pratt, and the Zhongmei Dance Company. For pop music fans, Juniata has hosted Fuel and Eve 6. In nearby State College at the Bryce Jordan Center,

students can see pop acts such as Phish, Rusted Root, the Dave Matthews Band and Ricky Martin.

Arts programs in Juniata's curriculum also offer students a turn in the spotlight. Singers can perform in the Choral Union or Concert Choir, while musicians can play in the Wind Symphony or Pep Band. Students can stretch their dramatic muscles in theatre projects by Eugene Ionesco, or create their own play through improvisation as they did in the science fiction play "Realists" in February.

Even the basic tenets of a college education such as research opportunities and internships give Juniata students a leg up on the competition. Heather Galbraith '01, a senior from Huntingdon studying environmental science, supervised students from Huntingdon Area Middle School in carrying out a water quality assessment project on Standing Stone Creek.

**"The students
are in a classroom
teaching their freshman year.
They have a minimum of three
to four classroom experiences
before student teaching even
takes place in the senior year."**

Dr. Michael Byron

Many graduates have worked at two or three internships in their time at Juniata. Five graduates of the accounting program have received job offers from "Big Five" accounting firms after serving internships at regional offices. Many Huntingdon-area businesses and agencies work closely with Juniata to place students and alumni. An active internship network has landed Juniata students at the Houston Museum of Fine Art and Swedish Medical Center at Englewood, Colo.

One of the most unique ways for our students to gain working-world experience comes in Juniata's "Innovations for Industry" course. The three-semester course is intended to give students hands-on technology experience while immersing them in working and adapting to a corporate environment. "It gives you a skill set that prepares you for the real world," says Scott Livingston '01, a senior from Johnstown studying information technology. Livingston worked as part of a team at Kish Bank.

Matt Humphrey '03, a sophomore from Phillipsburg studying information technology, worked to develop a Web site for Advanced Glassliver Yarns (AGY) LLC, an international business with a plant in Huntingdon. Humphrey and his colleagues worked with managers in Huntingdon and executives at the main North American AGY plant in Aiken, S.C. to produce a full-service informational site. The Juniata team received an AGY award for their work on the project.

Juniata's education department also makes certain that their graduates are well prepared for teaching by getting them out of Juniata classes and into other classrooms early and often. Many of the required courses in the curriculum include classroom experience — called a "practicum" in academia. "The students are in a classroom teaching their freshman year," says Dr. Michael Byron, associate professor of education and chair of the department. "They have a minimum of three to four classroom experiences before student teaching even takes place in the senior year."

Tracking the four-year experience at the College shows that students can find a niche for themselves beyond the classroom while finding myriad opportunities to make lifelong connections and friendships with students, faculty and within the community. "I've done so many amazing things at Juniata," Slingsby says. "Coming here has made me a completely different person."

Juniata senior Olin Babble '01 exchanges ideas with Kish Bank employee Susan Himmel as part of a project to improve the Intranet capabilities for Kish Bank's computer network. Babble is a member of a student team from Juniata's Innovations for Industry course, a three-semester requirement in which students work on technology projects for corporate and institutional clients.

Four Years in the Life

Juniata students have the opportunity to take part in a host of cultural and intellectual experiences that rarely are offered to undergraduates.

From foreign movies to foreign policy, Juniata offers an uncommon vision to help cultivate a cultural education.

Comedian Suzanne Westenhoefer

As the concrete was poured for the foundation of the William von Liebig Center for Science in March, Juniata College cemented the cornerstone of its fundraising efforts by securing an \$800,000 challenge grant from The Kresge Foundation. The funds will be used to support the construction of the center.

"The von Liebig Center for Science will catapult Juniata's biology and chemistry programs to the forefront of undergraduate science education," says Thomas Kepple, Juniata College president. "The center will give our students research and education opportunities that are rarely seen in undergraduate programs."

The Kresge Foundation is an independent, private foundation created by the personal gifts of Sebastian Kresge, founder of the chain of retail stores that eventually became Kmart Corp. The grant to Juniata is one of 54 grants bestowed by the foundation up to March of 2001. The foundation distributed more than \$44 million in funds to date and will continue to make new grant commitments during the balance of the year.

This is the largest Kresge grant of the five that Juniata has received to date from the Detroit-based foundation. To receive the Kresge challenge grant, Juniata College must meet

Building a Foundation for Science

fundraising goals set for the von Liebig Center and also for the college endowment. To date, Juniata College has raised more than \$66 million toward these projects—a figure that does not include the Kresge Grant—from trustees, staff, individuals, foundations and corporations. To meet the terms of the Kresge Foundation grant, Juniata must raise an additional \$6,451,479 by Sept. 30, 2002.

Grants are made toward projects involving construction or renovation of facilities and the purchase of major capital equipment or real estate. All grant recipients have raised initial funds toward their respective projects before submitting proposals for Foundation assistance. If the foundation makes a grant, they are made on a challenge basis, requiring that the remainder of funds be raised, ensuring completion of the projects.

As Founders Hall, the building where Juniata's first scientists were educated, looms in the background, the form of the William J. von Liebig Center for Science takes shape as Juniata prepares to take its science education capabilities into a new era.

"The Kresge Foundation grants are intended to help colleges and other institutions start grass-roots efforts to reach out to new donors," says Ron Wyrick, associate vice president for college advancement and marketing, development and gift-giving. "Instead of giving you a fish, they require you to learn how to fish."

Finding two or three major donors to make our fundraising goals is not how the Kresge foundation would like us to raise the remainder of the funds for the science center. They would like to see us reach a wide spectrum of donors."

There also are restrictions on what can be used for the \$6.4 million goal. The remaining funds must be raised by accepting gifts of cash, written pledges, or irrevocable gifts.

"Simply put, the von Liebig Center will provide the building blocks of a top-flight science education for Juniata students," President Kepple says. "The input from faculty, students and alumni has allowed Juniata to design a building that perfectly suits the College's educational mission."

The building's formal laboratory spaces will be outfitted to handle state-of-the-art research in both disciplines. The chemistry department will have three labs: a "wet" chemistry, or synthesis lab, where substances are made; a "dry" chemistry lab, where students make and use instruments to analyze chemical compounds; and a "swing lab," where students seeking space for research can set up experiments when the other labs are full.

"One of the most important things the von Liebig building will give us is informal and formal meeting spaces," says Dr. Jeff Demarest, professor of biology and chair of the department. "The overlooked aspect of science is that breakthroughs often happen when students and faculty toss ideas back and forth."

"What we will have is a building that is designed to enable students to become professional scientists more rapidly, if a building can do that," says Dr. Paul Schettler, professor of chemistry.

Dr. I. David Reingold, professor of chemistry, says the new labs will have analytical machines such as a liquid chromatograph-mass spectrometer and a gas chromatograph-mass spectrometer, both of which are used to analyze the components of a compound or mixture. "The labs also will be safer for faculty and students because desk space will be separate from the lab," Dr. Reingold explains. "We asked for much more student

research and desk space than the architects were used to providing. That's because we wanted the building to fit Juniata's style of teaching."

The biology department also asked the architects to design in 500 square feet of lab space for each faculty member and a student researcher. In addition, the department will feature several specialized labs that will make Juniata's facilities competitive with much larger institutions. Environmental science faculty also will be able to use the facility.

The labs include a cutting-edge cell culture and tissue facility where scientists can grow plant and animal biological material that can be reproduced consistently and is of consistent quality. The molecular biology facility will allow students to perform genetic research such as DNA fingerprinting and polymerase chain reaction (PCR) tests, which rapidly reproduce genetic material to identify unique genetic sequences within a cell. The biochemistry facility is similarly equipped. In addition, there is a facility for using light microscopes to look at living cells and electron microscopes to examine fixed cells. Students and researchers also will be able to capture digital images using a computer or film images from a camera using the electron microscope.

"All these labs will be centrally located and all have shared research spaces that are fully equipped with areas to write up research," Dr. Demarest says. "This facility couldn't be built with better timing. Biology is becoming a sought-after degree both academically and in industry. It's a good time to be a biologist."

It's also a good time to be a Juniata faculty member in charge of recruiting or interviewing new faculty. "We have recruited three faculty in the last two years by offering them the chance to do research in a new facility that they can help design," Dr. Demarest continues. "For science faculty, the big thing is staying current in your field. If you have facilities that allow you to stay current in your field, it allows the College to attract the best students, the best teaching faculty and outside research funding on which to build a reputation."

"To have a building that is better than the competition is important," says Dr. Reingold. "When you are trying to attract new faculty and talented students it becomes a real advantage."

For further information on Juniata's work with the Kresge Foundation, please call Lisa Wiedemer, assistant director of development, at (814) 641-3442.

A Celebration of Juniata

Women

From its early days, Juniata College has recognized the positive impact women have had on the College's success. Whether a harbinger of things to come or simply a fortuitous twist of fate, the enrollment of Linnie Bosserman and Phoebe Norris in the first class of the Huntingdon Normal Select School created lasting impact.

With only three students enrolled in that first class – the other being Gaius Brumbaugh, son of founder A.B. Brumbaugh – the founders set a course for inclusion that would guide the College into the future.

One hundred twenty-five years later, the role of these pioneering young women, and indeed, the contributions of all Juniata women, was honored with the first Celebration of Juniata Women held April 19 – 21 on the Juniata campus.

On a sunny spring weekend, after 31 months of planning, the Juniata community welcomed nearly 200 participants in a celebration of the role of women in Juniata's past and present. Through topical workshops, speakers, and opportunities for open expression, planners put together what one attendee called the best alumni event ever held at Juniata.

The cover from the Winter 2001 issue of the Juniata Magazine featured a photo of 19th century Juniata women. The photo at left features several of the 21st century Juniata women who were planners and participants in the recent Celebration of Juniata Women.

Facing page: A sampling of attendees at the Celebration of Women: Row 1 (from left) Marta Daniels '70 and Pat Kepple. Row 2 (from left) Kim Richardson, Jill Keeney, Nancy Siegel, Aliceann Wohlbruck '58, Deb Nardone '96 and Dottie Hershberger '50. Row 3 (from left) Mary Beth Emmons '76, Jodie Monger Gray '88, JoAnn deArmas Wallace, Jeanette Zalder '91, Helen Schmidlen Adams '57, Michelle Bartol '84 and Janine Katonah '69.

Lead by Juniata alumnae Dottie Hershberger '50, Helen Schmidlen Adams '57 and Aliceann Wohlbruck '58, and with the on-campus leadership of Pat Kepple and Michelle Corby '95, more than 100 additional volunteers were involved in organizing the event.

"Overall the weekend was wonderful," says Juniata alumni relations director Michelle Corby. "The volunteers who pulled this together thought of everything. We had a buy in from every volunteer involved, and as a result we were almost guaranteed a successful weekend. It was a very relaxed weekend full of thoughtful intellectual engagement on issues of importance to women."

For Aliceann Wohlbruck, executive director of the National Association of Development Organizations in Washington, D.C., the Celebration provided an opportunity to reflect on the wisdom of the College founders. "The Celebration made us aware of the foresight of the founding fathers in creating a coeducational institution. For those who care deeply about a just and inclusive society, this was an opportunity to say that men and women working together can nurture and build strong institutions. I hope this Celebration will encourage more women to return to campus to see that the Juniata we knew and loved continues to provide an uncommon education for men and women."

For Pat Kepple, the honorary chair of the event, the journey leading up to the Celebration created many memorable impressions. "One of the high points for me was working with a group of wonderful staff and alumni volunteers to pull this event together," she said. "I was continually amazed at how dedicated everyone is to this great place and how much they wanted to make the Celebration a success. From the very start, there was a sense of family that was sustained throughout the many months of planning and, indeed, continued throughout the weekend."

The involvement of Juniata students and faculty members in the workshops and seminars made the Conference an all-college event and provided connections between Juniata's past and future. Emeritus faculty members Betty Ann Cherry

Help to Complete 'The Fabric of Our Lives'

As part of Juniata's Celebration of Women events, Juniata graduates or family members are encouraged to send pieces of fabric that hold particular significance from their years at Juniata. The fabric will become part of a patchwork art project that will be displayed prominently in the new Founders Hall conference room dedicated to the women of Juniata.

Those interested in participating in the project can send a piece of fabric, a story and a donation of \$250 to Joan Engle, director of development, (814) 641-3108 or e-mail englej@juniata.edu.

Each piece of fabric will be incorporated into the patchwork art piece by Lee Park, a longtime employee at the Juniata Bookstore and an experienced quilter. The finished piece will hang in the new conference room after Founders Hall has been renovated. The central image block of the artwork was on display during the Celebration of Women weekend April 19-21. Each piece of fabric and its accompanying story will be collated into a limited edition book called "The Fabric of Our Lives."

The art project is part of an effort to raise \$150,000 for the construction of the conference room.

(history), Esther Doyle (English), Paul Heberling (anthropology) and Earl Kaylor (history) brought historical insight to the conference. Current faculty members like Jill Keeney (chemistry), Paula Martin (environmental science), Karen Rosell (art history), Belle Tuten (history) and Celia Cook-Huffman (peace studies) brought a more recent perspective and linked the generations.

Juniata students were involved in the Celebration both as spectators as well as participants. Becka Helsel '01, a peace studies/anthropology major from Altoona, Pa., was part of the panel titled "Working for Change: Social Justice Activists at Juniata." Joined by Marta Daniels '70, program director for Connecticut Humanities Council, Lona Norris '56, retired CEO of Morrisons Cove Home, and Maxine Phillips '67, managing editor of *Dissent* magazine, panel members discussed their experiences as activists working for social change and how their Juniata experience shaped their lives. Becka spoke of her involvement in social justice groups on campus today, noting that, while the causes may be different, the passion with which students embrace those causes is as sincere as it ever has been at the College.

Helen Schmidlan Adams summed up the first Celebration of Juniata Women by adding, "The Celebration provided a singular venue for Juniata women of various decades to come together to share their Juniata memories, to make new acquaintances, to begin to understand the similarities and the differences among the various generations, to establish new networking bonds, and to voice optimism for the roles of women at Juniata."

"The women of Juniata — alumnae, staff, students, trustees, faculty and administration — worked well together," she added, "in planning the weekend. There is a marvelous repository of strengths, skills, and enthusiasm among these women that was carefully culled in order to produce such a strikingly successful event."

From Linnie Bosserman and Phoebe Norris to Becka Helsel and her contemporaries, Juniata women have made a lasting impression on the College and the world in which they live. The Celebration of Juniata Women recognized those contributions and set the framework for future celebrations of these extraordinary Juniataians.

This sense of continuity among generations permeated the Celebration of Juniata Women. As Dottie Hershberger, retired director of alumni relations at Juniata and current community volunteer, put it, "Sharing with many generations of women helped us to know that old and young alike have many of the same fears. We were enlightened by each other's dreams and accomplishments; liberated from our fears to empower other women to be all they can be. We learned what an inspiration we can be for each other as faculty, friends and decades came together."

Lori Harris '97, makes a point as a panelist for the session "Beyond Boundaries: Making a Difference," an open discussion of how Juniata students surpassed everyday challenges to secure Juniata degrees.

of Juniata

men

Seniors Lauren Bierly '01, left, and Will Koeppen '01 will leave Juniata's geology program to pursue graduate fellowships at Washington University and Purdue University respectively.

Juniata Geology Students Secure Prestigious Graduate Fellowships

Two Juniata geology students, Lauren Bierly '01, a senior studying geology, and Will Koeppen '01, a senior studying geology and physics, received prestigious graduate fellowships.

Bierly, of Mount Airy, Md., received a three-year National Science Foundation graduate research fellowship to pursue a

master's degree in geology at Purdue University in West Lafayette, Ind. Bierly was one of 5,560 students to apply for the fellowship, and one of 903 students to receive the academic honor nationwide. For each year of the fellowship, Bierly will receive an \$18,000 stipend for living expenses and a \$10,500 cost-of-education allowance that is applied to the tuition for graduate studies.

She has been an active participant in many Juniata clubs during her four years at Juniata. She served as 2000-2001 president of the Andrew Lawson Geological Society, and served as president of the Japanese Club for 2000-2001.

Koeppen, of Oostburg, Wis., received a three-year graduate research fellowship for Washington University in St. Louis, Mo. to pursue a doctorate in geoscience and remote sensing.

For each year of the fellowship, Koeppen will receive a \$24,000 stipend for living expenses as well as a tuition waiver for the program in Washington's Department of Earth and Planetary Sciences. He will study at the McDonnell Center for the Space Sciences.

Koeppen spent the 1999-2000 academic year in Cochin, India, studying at the Cochin University of Science and Technology. He also worked at the Jet Propulsion Laboratory in Pasadena, Calif. in the summer of 2000. His duties included analyzing photographs taken of the surface of Mars.

Donna Weimer, the new Col. Sedgley and Elizabeth Bailey Thornbury Professor of Communication, holds the attention of students in a communications class.

Donna Weimer Named To Thornbury Professorship

At a surprise ceremony held after the Bailey Oratorical Contest in February, Dr. Donna Weimer,

professor of communication, was named the Col. Sedgley and Elizabeth Bailey Thornbury Professor of Communication.

The Thornbury professorship supports a Juniata faculty member from any field of endeavor who "is an outstanding scholar, a compassionate teacher and a visionary individual." The nomination of Dr. Weimer, who oversees the Bailey contest, is particularly apt because Elizabeth Bailey Thornbury was the daughter of Thomas F. Bailey, who served as president judge of Huntingdon County from 1916 to 1936 and endowed the Bailey Oratorical Contest.

Dr. Weimer created Juniata's communication curriculum and a designated program of emphasis in communication in 1990. She also is a member of the Information Technology Department and has participated in the development of teaching learning technologies on campus. She received the Lindback Teaching Award in 1993 and Juniata's Woman of the Year Award in 1994.

Elizabeth Bailey Thornbury, a 1929 graduate of Juniata, married Sedgley Thornbury in 1935. The couple met when Sedgley, a second lieutenant in the U.S. Army, was assigned as administrative officer to the Diamond Valley Civilian Conservation Camp in Huntingdon. After working at the camp, Sedgley attended Harvard Business School and returned to Huntingdon to pursue business opportunities. Sedgley later worked as an executive in various national insurance companies. After retirement, the couple moved to Florida, where Sedgley helped develop the Ormond Beach National Bank.

Pennsylvania Universities Use Juniata Model To Take Science On The Road

Using a model created by Juniata College's "Science in Motion" program, eight other Pennsylvania colleges and

universities have started pilot science outreach programs that bring chemistry and biology teachers and sophisticated scientific equipment into secondary school classrooms across the state.

In addition to Juniata, which created Science in Motion in 1987, and Gettysburg College, which started a similar program based on the Juniata model seven years ago, the following institutions have started Science in Motion outreach programs in 2000-2001: Drexel University in Philadelphia; Ursinus College in Collegeville; Wilkes University in Wilkes-Barre; Clarion University in Clarion; University of Pittsburgh at Bradford; Gannon University in Erie; and Westminster College in New Wilmington.

"These new programs are spread out geographically across the state to make the best use of them as pilot programs," says Dr. Donald Mitchell, professor of chemistry at Juniata and founder of Science in Motion.

Dr. Mitchell started Science in Motion in 1987 with a \$530,000 grant from the National Science Foundation (NSF) to bring professional chemistry equipment into rural and urban secondary schools. The Juniata

program visits more than 25 schools in central Pennsylvania and employs two teachers to operate two vans dedicated to each science area.

"If a school uses Science in Motion to provide a chemistry or biology experience to students 20 times a year, that becomes 70 to 80 times in the student's career where they have the opportunity to do cutting-edge science experiments," Dr. Mitchell says. "If we can approach that kind of participation Pennsylvania will have the finest science program in the country, bar none."

Eight other Pennsylvania colleges and universities are using the model created by Juniata's "Science in Motion" program to start pilot science outreach programs throughout the state.

Juniata Student Starts Pen Pal Program With Area Prisons

Alicia Noerr still likes to write letters. So much so that she decided to start a pen pal program between Juniata students and inmates in two local prisons.

Noerr '01, a senior from Lewistown who is studying psychology and business management, started the project in the fall of 1999. Today about 80 Juniata students are writing some 100 inmates, most of whom are incarcerated at the maximum security

Huntingdon or Smithfield State Correctional Institutes.

"Alicia is such a remarkable young woman and very responsible," says Harriet Kaylor, coordinator of the Huntingdon chapter of the Pennsylvania Prison Society. "We suggested some ways to structure the

program and she took our suggestions and added her own that made the program even more carefully controlled."

About 10 percent of the Juniata students started in the program as part of a one-credit course in service learning, but Noerr says the rest of the students are volunteers.

Student pen pals are obligated to write one letter a month, using their own funds for stamps and envelopes. Students must use only their first name or an alias in all correspondence. In addition, the inmates send all mail to a single Juniata post office box (the box for Juniata Campus Ministry).

Noerr conducts all the training for the program and handles any problems that might occur in correspondence. "I'm very blunt during training and we stress that the student has the responsibility to be very clear in their writing and to report anything that might become a problem."

College life these days can be a whirl of e-mails and essays, but Juniata College senior

Alicia Noerr

"One of Juniata's strengths is teaching all students how to write and communicate," Noerr says. "This program is a great exercise for that. You have to be very clear and precise. And, not many people can say they spent four years at school writing a prisoner."

Prayers for Peace Project Meets Goals

Amid the natural setting and breathtaking views of a Huntingdon

County hillside, gathering at the starkly beautiful Elizabeth Evans Baker Peace Chapel, pilgrims for peace made their way to the site to offer prayers. Every day for 366 days (because 2000 was a leap year), a group leader carrying a knapsack containing an Indian temple bell, a book of prayers, a rain poncho and a key to the site gate conducted a project known as 2,000 Prayers for 2000.

The 2,000 Prayers project, the brainchild of Dr. Andrew Murray, professor of religion and peace and conflict studies, brought together more than 1,000 people from Juniata College and surrounding communities to offer up prayers, poems or meditations from Baha'i, Christian, Hindu, Jewish and Muslim traditions over the course of the past year.

"I think my inspiration for the project came from Elizabeth Baker," Dr. Murray says. "Her love of daybreak and the dawn was something she wrote about and spoke about quite a lot."

Dr. Murray organized the effort by scheduling more than 80 group leaders from the College and community to lead the ceremony for a specific block of time — be it a week or a single day.

Leaders were asked to read a dawn liturgy and then read one or several prayers from their personal religious tradition. The leader also filled out a journal entry for that day, listing time,

As dawn breaks, Andrew Murray, professor of religion and peace and conflict studies, (left) and Amanda Albright '01, a senior studying geology, say a prayer for peace at the Elizabeth Evans Baker Peace Chapel.

date, leader's name and sunrise time. The journal also featured entries for weather, number of visitors attending the ceremony and a space for comments.

"The journal is an interesting record of the year," Dr. Murray says. "Some of the entries are very simple or quite moving."

Juniata Delivers Information Technology To High Schools

Juniata College is collaborating with Penn State's School of Information

Sciences and Technology to deliver an online course, "Principles of Information Technology," to Juniata information technology students and high school students across the state as part of a collaborative effort between Juniata, Penn State and Indiana University of Pennsylvania.

"Juniata has one of the best technology programs I have ever seen at a liberal arts college," says Jim Thomas, dean of Penn State's School of Information Sciences and Technology and a member of Juniata's IT advisory board. "The way Juniata has designed the program brings the world of information technology to the students and gives them the insight to see how that technology can be used as a solution for real-world problems."

Juniata offers the course, which was designed by Penn State and customized by Juniata's IT faculty, to 41 of its students and about 25 students in eight Pennsylvania high schools as an enrichment or college-preparatory course. The course is Internet-driven and designed for students to take using the World Wide Web.

"At Juniata, we want to maintain personalized instruction with students and faculty," says Dr. Loren Rhodes, professor of information technology and chair of the IT program. "We

As part of the Link-to-Learn Program, Professor Dennis Johnson instructs an Information Technology course for students at Juniata College and eight Pennsylvania High Schools via online classes and teleconferencing.

designed the introductory course so the students also meet once a week with a professor to discuss issues or related topics."

To allow the course's high school students to meet with Juniata faculty, each weekly meeting is held in Juniata's video teleconferencing facility in Good Hall, where each high school can use their own teleconferencing equipment to link with the instructor.

Funding for the course and related projects comes from a 2000-2001 \$375,750 Link-to-Learn grant from the Pennsylvania Department of Education.

University Of Louisville Administrator Accepts Position As Vice President, Chief Information Officer At Juniata

Ray Chambers, assistant vice president for information technology at the University of Louisville, has accepted a

position at Juniata College as vice president and chief information officer, effective July 1.

"Ray Chambers brings a wealth of experience in information management and technology at a time when those areas of expertise are at a premium in higher education," Juniata College President Thomas Kepple says. "Ray's background and expertise will very much improve Juniata's ability to serve its community and educate our students in information technology."

Chambers' new duties at Juniata include the supervision of the college's printing services, computer network services and the

Continued on next page

John Beale/Pittsburg Post Gazette

Teaching and Learning Technology Center. He also will act as a liaison for the college's Information Technology Program with businesses nationwide.

"The quality and depth of technology available to students at Juniata, the role of students in shaping policy and the commitment of the faculty are impressive, but it is the excitement and enthusiasm on the campus that made the biggest impression," Chambers says. "Juniata has raised liberal arts education to a new level by implementing the nation's first endowed technology program at a liberal arts college."

Chambers was promoted to his present position at the University of Louisville in 1992. Prior to that, he was executive director of printing and publication services from 1990 to 1992. From 1987 to 1990, he was director of the printing department at the University of Iowa.

Chambers earned a bachelor's degree in business administration from the University of Texas at Austin in 1970. He earned a master's degree in business administration and public administration from St. Edwards University in 1986.

Brumbaugh's Alumni Hall Hosts Political Convention

Delegates from the Republican Party in the 9th Congressional District gathered at what was

termed a political "mini-convention" at Alumni Hall in the Brumbaugh Science Center on the Juniata College campus in February to select a candidate in the May 15 special election for the 9th District Congressional seat vacated by retiring U.S. Rep. Bud Shuster.

The 9th Congressional District includes all of Bedford, Blair, Franklin, Fulton, Huntingdon, Juniata, Mifflin and Snyder counties. The district also includes parts of Centre, Clearfield and Perry counties. Bud Shuster had represented the district since 1973. He resigned in January, citing health concerns for himself and his family.

"It was a great opportunity to see the area's Republican Party machinery at work," said Dr. Jack Barlow, professor of politics. Dr. Barlow also attended the convention as an observer. "It gave the media and other interested observers a better feel for what the politics of the district are."

Each candidate spoke for five minutes. After the speeches the delegates cast a voice vote. A simple majority of 67 delegates was required to select a candidate. On the first vote cast, the convention delegates selected Bill Shuster, the son of Bud Shuster, to run. He went on to win the congressional seat in the May election.

Delegates to the mini-convention were chosen using a formula based on the number of Republican votes cast in each county or precincts in partial counties in the past presidential election. For every 1,000 votes cast for George W. Bush in the 2000 presidential election, each county or precinct received one delegate. For example, Franklin County cast 33,000 votes for Bush in the election and was represented by 33 delegates. Approximately 133 delegates attended the mini-convention.

Polly McMullin/Huntingdon Daily News

Bill Shuster fields questions from the media after securing the Republican nomination to run for the U.S. House of Representatives from the 9th District. Shuster was nominated at a "mini-convention" at Juniata College in February and later was elected to Congress in a special May 15 election.

License to Thrill — Juniata Alums, That is

Tired of cruising the highways and byways of Pennsylvania and seeing those alumni plates from competing colleges? Juniata has put its distinctive stamp on one of the latest college alumni plates authorized by the Commonwealth. Complemented by an image of the top of the Founders Hall tower, the license plate gives proud alumni an opportunity to shout their loyalty to the College from, well, from the back of their car.

"The most important thing about beginning an alumni plate program is that the first 300 pre-orders for the plate must be submitted through our Alumni Office," says Michelle Corby, director of alumni relations.

Corby is sending a letter to all alumni living in Pennsylvania explaining the license plate program. Each letter will contain a license plate application form. Alumni also can request a form via e-mail at alumni@juniata.edu, or on the College Web site, www.juniata.edu/pages/affinity/alumni/alumni/htm. (Click on the license plate.)

"We must have our 300 applications in by September," Corby says. "When we submit the applications, the state will send the plate directly to alumni in the fall."

The one-time alumni license plate fee is \$20, after which car owners renew their registration on their previous schedule at the normal state fee. Once alumni receive a form, they must submit the completed form with a check for \$20 made payable to Juniata College (Do not make the check out to the Commonwealth as is printed on the form). Send the application and check to Alumni Office, Juniata College, 1700 Moore St., Huntingdon, Pa. 16652.

One caveat: Alumni license plates cannot be personalized, so alumni will have to go through Pennsylvania's vanity plate application process for a personal plate message.

'33

Henry C. Glenn

resides in a retirement facility in Jackson, Miss. He would like to hear from anyone from the class of '33.

'39

C. Blanche (Gillaspie) Milligan

keeps busy managing a 100-acre tree farm, volunteering at a school for the stamp club, and caring for her sister. She resides in Summerfield, Fla.

'47

Simon "Si" C. Brumbaugh

and wife Mary Lou were surprised by their daughters with a spectacular 50th anniversary party Dec. 23, 2000 with over 130 guests. Si continues to work part time, travel, and ski as much as he possibly can (18 days this year). The couple lives in Spring Valley, Calif.

'49

Geraldine (High) Hewitt

is a part-time professor of Spanish at Gwynedd Mercy College and also adjunct Spanish professor at Delaware Valley College in Doylestown, Pa.

Arthur D. James

and wife Kathryn took a trip to Hong Kong to visit their son who teaches at the Hong Kong International School. They also visited Koh Sanci in Thailand and Guilin in China. He recently finished his eighth book.

CLASS NOTES

'50

John M. Buterbaugh

was featured in a Quaker Oats commercial that made its network debut in January 2001. The commercial, which aired during the CBS Evening News, featured John along with eight other men and women who experienced cholesterol-lowering effects after eating oatmeal for 30 days.

Vincent J. De Feo

retired in 1998 from his position as chairman of the department of anatomy and reproductive biology at the University of Hawaii in Honolulu, a department he had built since 1966. Since his retirement, he has worked part-time in support of the Institute for Biogenesis Research. The Institute was founded by state legislators as a result of the department's accomplishments most notably in the first cloning of mice, and in the production of freeze-dried sperm, which yielded viable offspring and new transgenesis techniques.

Norman J. Gerri

received his 50-year pin from Aberdeen for his research as a chemist. Norman and wife Irene celebrated their 50th wedding anniversary Feb. 17, 2001 in Seattle, Wash.

Donald C. and Eleanor (Seese) Kaufman '51

enjoy traveling around the country visiting their four children, three grandchildren, relatives and friends. They also enjoy attending reunions and concerts. Donald celebrated his 75th birthday in October 2000.

'51

George E. Kensinger

and wife Dona observed their 50th wedding anniversary Dec. 23, 2000. The couple lives in Martinsburg, Pa.

M. Eliner (Newcomer) Shoaf

and husband William celebrated their 50th wedding anniversary Nov. 9, 2000. The couple lives in Wheeling, W.Va.

'53

Robert S. Mould

and wife Donna retired and report a "great life" in central Florida. Robert is involved with sports and Donna is a volunteer with a hospice program.

'58

Anthony S. Chirico

retired from Lockheed-Martin Dec. 29, 2000. He began work with Eigent STI Jan. 1, 2001. Anthony lives with wife Nancy in Alexandria, Va.

Jane (Butts) Kilgore

retired Nov. 1, 2000 from the Surgicenter in Ligonier, Pa. after 30 years of service as a laboratory chief of infection control and registrar.

Ruth (Perestam) Klehm

and husband William enjoy the freedom of retirement by traveling when they can. They recently spent a month "down under" in New Zealand, Australia, and Fiji. They traveled to France in 2000.

'62

Nancy (Scott) Slezak

was recognized with the Community Award, one of the Women of Distinction Awards, given annually by the Soroptimist Institute of Butler County in Pennsylvania. Nancy originated and teaches the Teen Parenting Program in the Butler schools and is the program coordinator for the Butler School District.

'63

Barbara (Canto) Davis

retired from the military school system and moved to Benicia, Calif., near the Napa Valley wine country. She is now in Washington, D.C., serving as an instructor for the Presidential Classroom, which brings students from all over the U.S. to study the workings of the government. She says that she knew it was time to retire when Ronald R. Blanck '63 retired from the military!

'67

Barbara (Edwards) Durant

retired from Lucent Technologies in June 2001, where she worked as a business systems analyst.

Karyn L. Moesel

earned "Pied Piper" honors from Children Photographers of the World, Ltd. The Pied

Piper Award is the most prestigious achievement recognition for a photographer in this international organization. Her studio has been established in the city of Fairfax, Va. for the past six years.

Carol Diggory Shields

published a children's book, *Animagicals: Music*, which was named one of the ten best picture books of 2000 by Amazon.com. *Animagicals: Music and Animagicals: Colors* were published in November by Handprint Press. Carol currently has nine children's books in print.

James R. Sutton

was promoted to chief operating officer of U.S. Foodservice in February 2001. U.S. Foodservice is one of the largest broad line foodservice distributors in the U.S. James and wife Carol (Ribblet) Sutton '67 reside in Hollidaysburg, Pa. with their three children.

'68

William C. Bard

formed an executive search firm in Florida to recruit banking, accounting, and financial service professionals. He recently helped the firm win the Excellence in Distance Training Award from the U.S. Distance Learning Association.

'69

Pamela (Haskell) Haroy

graduated from Columbia University in May 2000 with a master's degree in clinical social work. She moved to Denver in December where she conducts workshops for families and parents based on a nationally recognized character education program.

James F. Nicolosi

was named senior vice president of the Safety & Ecology Corporation, located in Knoxville, Tenn. Jim joined the company two years ago as the director of sales and marketing.

'70

Michael D. McCartney

serves as president of the Steuben County Bar Association for 2000-2001. Michael and family live in Bath, N.Y.

'71

Grace (Brustman) Gross

retired from her position with the York County Children and Youth Services in Pennsylvania after 20 years. She has appeared in two productions with the Mechanicsburg Little Theater.

'74

Daniel C. Herzog

received the Volunteer Consultant of the Year 2000 award from Community Access Unlimited of Elizabeth, N.J., in April 2001. He provided client consultation through a sex education program.

76

Janet E. Mercincavage

was selected as one of 25 emerging women administrators in higher education in Pennsylvania. The Pennsylvania American Council on Education (PACE) The Network, in conjunction with the American Council on Education, recognized Janet after a competitive nomination and application process. Janet is the vice president for student affairs at King's College in Wilkes-Barre, Pa.

Ruth Ann (Randall) Offutt

was presented with the Silver Medal Award from Frederick County Advertising Federation, located in Maryland, in 1998. The award was in recognition of her outstanding contributions to advertising and furthering the industry's standards, creative excellence and responsibility in areas of social concerns. Ruth Ann has been active in Frederick County for many years, serving 12 years on the advisory board of Allfirst Bank. She is the founding

director, past president, and past secretary of Advocates for Homeless Families as well as many other groups. Her spare time is spent as a musician, chiefly on the mandolin and fiddle. She also enjoys walking, camping, gardening, and traveling.

77

Elaine (Joyce) Scherer

is a physician's assistant in Blairsville, Pa. She and husband Bernie play in a band, Gary Racan and Carnival, with Bernie as rhythm guitarist and Elaine as a background vocalist.

78

Charles J. Koren

was appointed by Pennsylvania Governor Tom Ridge to the 12-member Pennsylvania Athletic Oversight Council, where he will represent nonpublic schools. Charles is from Ebensburg, Pa., and is director of education for the Altoona-Johnstown Diocese.

Volunteer Training Conference Set

Juniata alumni who are looking for ways to remain active at the College or those interested in volunteering their time can return to campus on the weekend of July 21 and 22 for a no-cost educational development session at the Juniata College Volunteer Leadership Training Conference.

"This conference has everything you need to know about volunteering to help Juniata College," says Michelle Corby, director of alumni relations. "And, it's truly a volunteer effort because the faculty for the conference will be fellow alumni. The Alumni Office staff will be there to help facilitate the sessions."

The conference, titled "Juniata Pride," informally starts Friday, July 20, when early arrivals can register for the conference and get their rooms at Tussey-Terrace Halls. There is a room charge of \$35 for a single or \$50 for a double for Friday night only.

The conference officially begins Saturday, July 21, as participants will attend a conference overview and attend a session on volunteer opportunities in international programs; in various alumni affinity groups; class fund and campaign opportunities; and reunions. In the afternoon, there will be a general session detailing how to start and nurture a regional alumni club. Later, there will be three concurrent sessions, followed by another set of three concurrent sessions. The topics addressed in the concurrent sessions will include reunions, affinity groups and parent-alumni career teams.

The annual Alumni Appreciation Dinner, formerly a Homecoming event, will be at 7 p.m. in Ellis College Center. The dinner will be followed by an evening of dancing and swing music by the band Big Tubba Mista.

The sessions for Sunday, July 22, include campaign committee meetings at 8 a.m., involving roundtable discussions of volunteer opportunities. There will be a worship service at 10 a.m. at the Stone Church, or participants can choose to tour the Baker Peace Chapel. After a final general session on how to be a lead volunteer, the conference will hold a luncheon at 12:30 p.m. in Ellis College Center.

Western Wyoming Alumni Association

Shown is the first meeting of the Juniata College Western Wyoming Alumni Association on Jan. 28, 2001. We are an unofficial group, meeting on an as needed basis on the slopes of Grand Targhee, in western Wyoming. Meetings are open to all JC alumni. Pictured are (l-r): Ronald S. Shaw '67, Timothy E. Jablonski '73, and Michael A. Jablonski '74. Shown in the background are Mount Owen, the Grand Teton, and the Middle Teton.

CLASS NOTES

Charles P. "Chip" Lohmann

is the father of two girls, Amelia, age 8, and Olivia, age 5, and is enjoying life in central Chester County in Pennsylvania.

'79

Linda D. Baker

Dr. Baker, a large-animal veterinarian who

specializes in dairy management and production, traveled to England from April 4 to May 4 to assist veterinarians in arresting the outbreak of foot and mouth disease. She worked with a group of United States Department of Agriculture veterinarians who coordinated their efforts with Ministry of Agriculture to fight the spread of the disease throughout the United Kingdom. Linda has an office in eastern Pennsylvania doing dairy production medicine. Her practice focuses on herd health programs and increasing profits for dairy herds. She also works for the University of Pennsylvania School of Veterinary Medicine where she is a research coordinator in Dairy Nutrition and Animal Health Economics. She teaches veterinary students and works in developing continuing education courses that the School of Veterinary Medicine offers to graduate veterinarians. Linda lives in Bowers, Pa. with husband Dr. William J. Messersmith '79, a dentist in Fleetwood, and children Matthew, age 9, and Aaron, age 7.

Robert H. Goldstein

was promoted to Haas Distinguished Professor in 2000. He works in the department of geology at the University of Kansas.

Susan E. Kane

works at the American Foundation for AIDS Research (amfAR) as the director of professional and public education in New York City.

Li A. Mitnick

works in Centre County with children and families with mental health issues. She thoroughly enjoys her new life in rural Huntingdon County with her 17 year-old son, Brendan McGrath, and three cats.

'81

Anita (Mock) Hanawalt

recently received a doctorate in music cultures on Dec. 31, 2000 from the Graduate School for Interdisciplinary Arts and Sciences located at The Union Institute in Cincinnati, Ohio. She currently continues as a senior adjunct professor of music at the University of LaVerne in California. She serves as an organist at the First Presbyterian Church of Monrovia, while she launches a national job search for a full-time college music teaching position.

Douglas F. Klepfer

relocated his podiatry medical practice to Ardmore, Pa., in January 2001.

'82

Denise "Pat" Phibbs

works as an industrial chemical reporter at the Bureau of National Affairs Daily Environment Report. Pat would love to hear from fellow classmates. She lives in Potomac, Md.

Milan P. Tweardy

was promoted to chief operating officer of the Merrill Lynch Capital Markets Group in Switzerland and is responsible for finance and operations. Previously he was the group manager of Merrill Lynch Derivative Products. He and wife Lisa and children Connor and Christian enjoy living in Switzerland.

'83

F. Andrew Berdy

moved to Harrisburg where he works for *The Patriot-News* as the business section page designer and copy editor. Previously, he worked in Wilkes-Barre for five years as the sports page designer and copy editor at *The Times Leader*. He also spent ten years in Lewistown as sports editor of *The Sentinel*.

William H. Boswell

works as chief technology officer for E-markets Inc. in Ames, Iowa. Bill holds a patent, as co-inventor, on a human-computer interface system that remotely controls and monitors application processes across wide-area networks.

Eric B. Foster

is associate director of regulatory affairs for Schwarz Biosciences Inc. Eric and his family relocated to Apex, N.C.

Nancy S. Morrow

graduated from Weidner University in May 2000 with a doctorate as a clinical psychologist. Nancy works at Philadelphia Psychological clinic, and teaches part-time at Weidner University.

'84

Craig W. Hoffman

received his master's degree from New York University in nonprofit management in May 2000. He serves the national headquarters of the United Church of Christ as data manager for the financial development ministry team. He and his partner relocated from New York City to Cleveland, Ohio.

Mark E. Hudson

accepted the position of chairman of the department of anesthesiology, at UPMC-Shadyside Hospital in Pittsburgh, Pa. Mark is an associate professor of anesthesiology at the University of Pittsburgh and a practicing cardiac anesthesiologist.

'85

David S. John

was named policy analyst for the Pennsylvania house majority legislative planning and development office. He is also the staff director of the Keystone Commission on Education for Employment in the 21st century.

Gregory A. Lomax

became a partner in the Cherry Hill N.J. office of Wolf, Block, Schorr, Solis-Cohen.

Joel G. Starr

received his master's degree in geophysics from the University of New Orleans in 1990. Since that time he has worked in the oil and gas industry. He and wife Kelly married in 1992 and have three children. The family resides in Walton-on-Thames, England, on an expatriate assignment.

'86

Amy E. Clark-Frederick

works as a school social worker at an alternative school for children with behavioral problems. The schedule is great with her two children Jennifer, age 6, and Kyle, age 4. Amy is looking forward to her first summer off.

'87

Robert T. Greenlee

and his family relocated to the Midwest, where Robert has taken a position as a research scientist with the epidemiology department at the Marshfield Medical Research Foundation in Marshfield, Wis.

Charlene (Porta) Hinish

left her position as a forensic scientist with the Pennsylvania State Police to stay at home with children Aaron, age 7, Alyssa, age 5, and Allison, age 1. Charlene and husband Scott T. Hinish '85, would love to hear from their old college buddies. The family resides in Mechanicsburg, Pa.

'88**Jill (Ranck) Maguire**

was promoted from financial analysis manager to the financial analysis and systems manager of Fulton Financial Corporation in Lancaster, Pa. She joined Fulton in 1988 after employment with CoreStates Financial as vice president/financial consultant. In October 1999, she moved with husband Michael, and sons Kyle, age 6, and Austin, age 3, to Lititz, Pa.

Eric G. McGee

received certification as a senior professional in human resources from the Human Resources Certification Institute. He is a human resources consultant for the Northwestern Memorial Hospital in Chicago.

Ann (Tinsman) Rab

was married in 1996. College roommates **Betty-Anne (Navosynski) Reichard '88** and **Catherine (Hillard) Sechrist '88** were in the wedding. Ann works for TheraCare, a provider of early intervention services in New York City, looking to begin a neonatal program for premature babies in need of therapy. She received her doctorate from Teacher's College in May 1999.

'89**Paul D. Albitz**

married Carolina Valencia in December 1999 in Naples, Fla. Their son, Paul Jr. was born June 14, 2000.

Diana (Gough) Gomez

works with ESL students who are having difficulty in high school. She finds the position quite challenging, but appreciates the opportunity to advocate for international students and to communicate with their families. Most of her students are Spanish-speaking, with a growing number of students from Sierra Leone, Africa.

James L. McMonagle

was assigned to a death penalty case while working for the Luzerne County district attorney's office. His wife, **Julie (Azer) McMonagle '89**, is employed by the Pennsylvania Environmental Council.

David D. Reed

was appointed to serve as a member of the Maryland State Board of Examiners for Optometry for a term through June 2002. David is a residency-certified optometrist at Seidenberg Protzko Eye Associates.

Mark A. and Melinda (Brandt) Rolfs

moved from Los Angeles, Calif. to the New York area in July 2000. Melinda accepted a position with CastleRock Partners in Manhattan as an equity research analyst. Mark is working as a consultant on several projects as a designer and project manager.

Marilyn M. Shaw

spent the year 2000 teaching art in a variety of locations. She was involved with the Blair County Recreation and Parks organization and the State Correctional Institute in Smithfield, Pa., in addition to continuing to teach in her classroom at Ben Franklin Crafts in Altoona, Pa.

'90**Kathleen K. Fanzo**

opened a Medicine Shoppe Pharmacy in Lewistown, Pa. in June 2000. She would like to hear from fellow Juniata alumni, especially members of the class of '90.

Annette (Oberdorf) Krecic

recently completed her postdoctoral training at Northwestern University in Evanston, Ill. and joined the faculty in the biology department at Marquette University in Wisconsin as a research associate.

'91**Lisa (Mitschang) Pyne**

was promoted to the director of business development of government markets where she is responsible for sales of ESIs training and consulting services to federal and local governments. Her husband Gary is a controller at Jacobson, Price, Holman and Stern. They have two children, William, born May 14, 1998, and Timothy, born January 24, 2000.

'92**Todd S. Emrick**

moved from San Francisco to Amherst, Mass. He is in his first year as professor of polymer science and engineering at the University of Massachusetts, Amherst.

Heidi (Harpster) Graci

keeps busy since she resigned from her kindergarten teaching position to be a stay-at-home mom. A recent highlight was meeting actor John Travolta and director Nora Ephron when her son was casted to do a photo shoot with Travolta for the movie "Lucky Numbers." Heidi also received her master's degree in education from Penn State University in December 2000.

Lorraine (Busam) Mietlicki

works for IBM Global Services in Virginia and was promoted to advisory project manager in November 2000.

'93**Carolyn A. Copenheaver**

received her doctorate in forest resources from Penn State University in December 2000. She is an assistant professor in the forestry department at Virginia Polytechnic Institute and State University.

Lisa M. DeChano

obtained a master's degree in space studies from the University of North Dakota in Grand Forks, N.D., in 1994 and master's degree in geography from Ohio University in Athens, Ohio in 1997. She received the first doctorate in the history of Southwest Texas State University in San Marcos, Texas May 12, 2000. Lisa spent the 2000-2001 academic year as an assistant professor in the department of geography and anthropology department at the California State Polytechnic University in Pomona, Calif. She will begin a new assistant professor position at Western Michigan University in Kalamazoo in Fall 2001.

'94**Patrick C. Fall**

received his master's degree in biology from Fairleigh Dickinson University in 1996. He received his doctor of osteopathic medicine degree from Philadelphia College of Osteopathic Medicine in June 2001. His internship is at Mercy Catholic Medical Center in Philadelphia, and from there he'll begin a residency at Jefferson University Medical Center. Patrick and wife Louise reside in Philadelphia.

Kristin McLaughlin

graduated in December 2000 with a master's degree in elementary education from Kutztown University. She currently teaches first grade in Daniel Boone Area School District in Douglassville, Pa. Kristin also traveled to San Francisco as a finalist in the Pillsbury bakeoff.

Kimberly (Zeno) Sands

graduated with honors from the Art Institute of Philadelphia with an associate's degree in specialized technology in the field of multimedia. She will be featured in this year's edition of "Who's Who Among Students in American Junior Colleges."

CLASS NOTES

and husband Ron joyfully announce the birth of daughter, Audrey Marie, born Aug. 4, 2000. Audrey weighed 7 lbs. 8 ozs. and measured 20 inches. She joins big brother Ian, age 3. The family resides in Greensboro, N.C.

Janet (Brandt) O'Boyle '88

and husband Tim announce the birth of twins, Sarah Margaret and Ryan Timothy, born July 23, 2000. Sarah weighed 5lbs. 3 ozs. and Ryan weighed 6 lbs. 2 ozs. The family resides in Elkridge, Md.

Laura (Dobbins) Talbot '88

and husband Robert announce the birth of their first child, Kayleigh Anne, born Oct. 27, 2000. She was 3 1/2 months early, weighed 2 lbs. and measured 14 inches. Kayleigh received incredible care at St. Barnabus Medical Center in Livingston, N.J. and she came home after two months in the NICU without a single monitor or complication! Thank God for modern medicine! At 5 months old, Kayleigh weighed 11 lbs.

Edward R. Hoffman '89

and wife Laura are proud to announce the birth of daughter, Claire Mayfield, born August 1, 1999. She joins brother Kyle Samuel, age 5. Ed is a pilot for US Airways and his wife is a stay-at-home mom. The family resides in Hummelstown, Pa.

Pauline (Brandt) Johnson '89

and husband Neil are proud to announce the birth of their first child, Abigail Leigh. Abbey was born Aug. 9, 2000 and weighed 10 lbs. 6.5 ozs.

Douglass A. Kovach '89

and wife Rebecca announce the birth of their first child, Audrey Sarah, born Sept. 16, 2000. She weighed 7 lbs. 4 ozs. and was 21 inches long at birth.

Christine (Lago) Bair '90

and husband Bruce announce the birth of son, Michael Bartolameo. He weighed 8 lbs. 4 ozs. and was 21 1/2 inches long at birth.

Theodore T. Blair '90

and wife Laurie gave birth to twins, Scott and Alexis, born May 24, 2000.

Tina (Martiens) Schroeder '90

and husband John are pleased to announce the birth of their second daughter, Julia Corinne, born Jan. 25, 2001. She joins big sister Natalie, age 3. The family resides in Northern Virginia.

Joanna (Robert) Greene '91

and husband Stephen are pleased to announce the birth of their first child, Anna Baldwin, born Sept. 17, 2000. The family moved to Indianapolis, Ind., in April 2000.

Kristen (Guest) Kasproff '91

and husband Daniel announce the birth of son, Samuel James, in October 2000.

Meg (Burpee) Treacy '91

and husband are happy to announce the birth of their second son, Liam Jonathan, born Jan. 25, 2001. He weighed 6 lbs. 9 ozs. and measured 19 1/2 inches long. Liam joins big brother Patrick, age 2.

Deanna (Gahagan) Pinkham '92

and husband Daniel are proud to announce the birth of daughter, Ashley Karen, born Sept. 27, 2000. The family recently moved to El Dorado, Ark. where they now work for Great Lakes Chemical Corporation South Arkansas Chemical plants.

Heidi (Harpster) Graci '92

and husband Joe are happy to announce the birth of son, Daniel Joseph, born January 10, 2001. He joins big brother, Timothy.

Lisa (Cooper) '92 and Thaddeus J. Loucks '91

joyfully announce the birth of daughter, Emma Catherine, born Jan. 8, 2001. Emma weighed 8

CLASS NOTES

lbs. 10 ozs. and measured 21 1/2 inches long. Thad works as an environmental scientist for Timmon's in Richmond, Va. Lisa works as a physical therapist at Retreat Hospital.

Stacy (Wessel) '92 and Matthew A. Missigman '92

are proud to announce the birth of their first child, daughter Sydney Claire, born Aug. 9, 2000. They relocated in Maine in January 2001 due to a promotion Matt received.

Tina (Smith) O'Shea '92

and husband Michael announce the birth of son, Jack Timothy, born Feb. 2, 2001. Jack weighed 9 lbs. and 11 ozs. The family currently resides in Long Beach, Calif.

Kimberly (Bechtel) Zientek '92

and husband Mike announce the birth of son, Ethan Michael, born Jan. 9, 2001. He was welcomed by big sisters Samantha, age 5, and Sophia, age 3.

Teresa (Baum) Clark '93

and husband Jamie are blessed with their second son, Jacob William, born June 5, 2000. He joins big brother Jarret Wade, age 3 1/2. Teresa feels lucky to stay home with them.

Rebecca (Sponsler) Del Baggio '93

and husband John announce the birth of son, Austin Michael, born June 24, 1999. They are expecting their second child in May of 2001.

Cynthia (Molloy) '94 and Greg R. Jacobelli '95

would like to announce the birth of their son, Cooper Hudson, born July 20, 2000. He weighed 7 lbs. 2 ozs. and was 21 inches long.

Aaron M. Blass '95

and wife Valerie announce the birth of their second daughter, Gwendalyn Elisabeth, born Sept. 3, 2000. She weighed 8 lbs. 3 ozs. and measured 20 inches in length.

Wade D. Kurzinger '95

and wife Tomi announce the birth of son, Thomas Ambrose,

born Dec. 14, 2000. Thomas joins big sister Toni, age 8, and brother Wade Jr., age 23 mos.

Jennifer (Bowman) Sampson '95

and husband Zachary are pleased to announce the birth of their daughter, Payton Alexis, born Jan. 31, 2001. She weighed 3 lbs. 7 ozs. and measured 15 1/2 inches long.

Julie (Costa) Costa-Malcolm '97 and Devin E. Malcolm '97

would like to announce the birth of their second son, Liam Alexander, born Jan. 19, 2001.

Jeremy R. Brummet '97

and wife Katie are pleased to announce the birth of son, Noah Robert, born Jan. 5, 2001.

Denise A. Walter '98

and David Wetzel are pleased to announce the birth of son, Dakota Hunter, born Dec. 18, 2000. Dakota weighed 9 lbs. 3 ozs. and was 20 inches long.

Obituaries

1924 Grace (Stauffer) Fulton December 8, 2000.

1927 Helen (McCall) West

March 14, 2001 – Helen was a former teacher in the Warriors Mark High School and a resident of Huntingdon County since birth. She was a member of the First United Methodist Church in Huntingdon and the Women's Society of Christian Service, where she also had served as president.

1928 Lillian P. Stake

January 27, 2001 – Lillian received her master's of education degree from Penn State University. She retired in 1968 after serving 36 years as a teacher. She was a member of the Satillo United Methodist Church.

1929 Cyrus O. Caulton

February 22, 2001 – After graduating from Juniata College, Cyrus was employed by Victor Talking Machine Company as a physicist engineer. He retired from RCA in 1972. Cyrus and wife, the

late Isabelle (Nichols)

Caulton '29, met as students at Juniata and married in 1933. Their home, in Bryn Mawr, Pa., was open to Juniata alumni, friends, students, faculty, and staff. They hosted an annual holiday party for Philadelphia area alumni for many years. They followed all JC sports with great interest, with the women's volleyball team getting their special attention. Cyrus was class fund agent for the class of 1929 for approximately 60 years. He is survived by daughter **Barbara (Caulton) Sterne '59**.

1929 Marion (Commons) Hayes

February 2, 2001 – Marion is survived by son **Arthur C. Hayes '71** and daughter **Jacquelyn (Hayes) Gibbons '57**.

1929 Frances (Shelly) King

November 28, 2000 – Frances was a home economics teacher in Schwenksville and Reading. She was a member of the Stone Church of the Brethren in Huntingdon, Pa. Frances is survived by son **Alan S. King '61** and daughter **Ann (King) Layman '63**.

1929 Raymond W. Tyson

January 1, 2001. His wife was the late **Anne (Jones) Tyson '29**.

1930 Irene (Mohler) Grove

February 13, 2001 – Irene taught in the Huntingdon public schools and also worked as a private kindergarten teacher. She was a member of the Anchorage Presbyterian Church.

1931 Leroy Z. "Toy" Suloff

December 19, 1999 – Leroy pitched for the St. Louis Cardinals. He was also the supervisor in Tire Fabric at FMC for 45 years. He was a member of the Grace United Methodist Church. Toy is survived by son **David L. Suloff '58**.

1935 Martha (Earnest) Bowman

January 19, 2001 – Martha worked as a teacher in the Huntingdon Area School

District for 30 years, primarily in the fifth grade at Alfarata Elementary School. She was a lifelong resident of Huntingdon County, Pa., and enjoyed extensive world travel in her retirement. She was a member of the First United Methodist Church in Huntingdon.

1936 Thomas J. Hopkins

November 6, 2000 – Thomas graduated from Drew Theological Seminary in 1940 with a master's of divinity degree. He was also awarded an honorary doctorate of divinity degree from Juniata College in 1956. During graduate work at Columbia University, he studied with anthropologist Margaret Mead. Thomas was a member of the President's Circle at Juniata College and served on the board of directors of Lycoming College. He was also a member and officer of the advisory board of the Columbia-Montour Agency on Aging.

1937 Lilly (O'Friel) Welch

February 5, 2001 – Lilly retired as an elementary and secondary school teacher in 1968 from the Altoona Area School District. She held local and state offices with the Catholic Daughters of America and was a member of St. Michael's Catholic Church in Hollidaysburg, Pa., where she was active as a lecturer, eucharistic minister and with many other ministries.

1939 Lela A. Hollinger

October 14, 2000.

1942 Edmund E. Minaya

February 11, 2001 – Edmund spent most of his life in the publishing business. He worked in New York and Chicago as Midwest manager for *The Journal of Commerce*. In 1969, he launched a weekly newspaper, *The Mirror*, in Miramar, Fla. He was very active in civic affairs and was the founding president of the Miramar-Pembroke Pines Chamber of Commerce. In recent years he sold commercial real estate in the Miami area. Edmund was a tail-gunner in World War II for the U.S. Army Air Corps.

1945 John B. Kleffel

October 28, 2000 – John served as a pastor and institutional chaplain for 31 years, and spent 14 years in human services, including work with the New Jersey Department of Youth and Family Services, Habitat for Humanity, and also at a shelter for battered women. He was a member of the Willingboro Presbyterian Church.

1948 Bruce H. Briggs

January 9, 2001 – Bruce retired from the Butler Area School District in Butler, Pa. after 26 years of service. During his tenure he was first a teacher and later served as principal. Bruce is survived by wife Virginia (Albert) Briggs '44.

1949 William F. Wilson

December 24, 2000 – William was a well-known television sportscaster and sports director for WJAC-TV, Johnstown, Pa. for 35 years. He was a veteran of the U.S. Navy, serving during World War II. An accomplished vocalist, William and his orchestra were the featured entertainment for the 13th Annual Charity Ball at J.C. Blair Memorial Hospital, Huntingdon, Pa.

1950 Marion (Cray) Kuhn

January 11, 1990 – Marion passed away after a short time of battling Lou Gehrig's disease (ALS).

1950 Richard P. Snyder

January 6, 2001 – Richard was a World War II veteran with the American Coast Guard. He was retired from Mobay Chemical Co. and served on the New Martinsville, W.Va. city council for 13 years. He received the River Heritage Days Citizenship Award and oversaw the design of the New Martinsville city seal. Richard was mayor of New Martinsville, W. Va., from 1993 to the present.

1951 Joyce (Cummins) Snyder

February 6, 2001 – Joyce attended the First Baptist Church and was a member of the Wetzel County Women's Democratic Club.

1954 Joseph B. Miller

February 17, 2001 – Joe served in the army as a counterintelligence agent in Germany from 1954 to 1955. He received his master's degree from Yale University in 1958. He worked as a finance representative for most of his life and later became a diamondtologist and fine jewelry sales associate.

1957 Lois (Spice) Malboeuf

February 27, 2001 – Lois taught in the Hartford Public School System. She was very active in girl scouts and PTO. A talented painter, she also enjoyed ceramics, gardening, bowling and square dancing.

1958 William C. Keay

January 9, 2001 – William also attended the University of Delaware. He taught chemistry and physics at North East High School in Maryland for 20 years, and for the previous 20 years in Delaware.

1959 Janet (Schall) Niebojeski

December 4, 2000 – Janet was a schoolteacher in Palmyra for 42 years, most recently at the Charles Street Elementary School in Palmyra, Pa.

1967 Barbara Ellen (Kohler) Lee

December 5, 2000 – Barbara worked at the Jackson Laboratory for 17 years in research. She was previously employed by the National Institutes of Health and the Maine Medical Center Cancer Research Institute. She loved gardening and wildflowers and her cottage on Branch Lake. Barbara is survived by husband Grant R. Lee '68.

1969 Christine (Persson) McKean

July 31, 2000.

1975 James V. Rossi

December 25, 2000.

John I. McCloskey

April 16, 2001 – John attended Juniata College for two years from 1955-1956.

Juniata Alumni Costa Rican Adventure Survivors

Thirteen alumni and friends went tropical with guide Bob "Doc" Fisher March 6-15, 2001, for a 10-day alumni adventure in beautiful Costa Rica. The group shared experiences such as exploring fantastic beaches, seeing rainforests and volcanos, birdwatching, and reminiscing about shared Juniata experiences. If you are interested in becoming a Juniata Travel Volunteer to help plan future tours around the world, please contact Michelle Corby, director of alumni relations, at (814) 641-3445 or corbym@juniata.edu.

Guests, pictured left to right, are:

Standing: John Neely '68, Lynn Neely, Duane Silvestri '83, Teri Silvestri, Cindy McKinney '71, David Herr, Judy (Hershey) Herr '67, Sheila Squier '83, Lynn (Bergstresser) Schaffer '66, Ron Schaffer, Merrick Bechini.

Front Row: Simon Corby, Michelle (Koren) Corby '95, Victor Rojas (bus driver)

Hey, classes '91 and '96!

Planning has begun for your 5 and 10 year reunion celebrations at Homecoming this year. Mark October 19-20, 2001 on your calendar for a Homecoming you won't want to miss. If you have any suggestions or would like to be a part of your class reunion committee, please contact the Alumni Office at: 1-877-JUNIATA or alumni@juniata.edu.

**"Juniata College:
Uncommon Vision,
Uncommon Loyalty"**

By Earl C. Kaylor Jr. '46

Dr. Kaylor revises his 1976 history "Truth Sets Free" to 2001, complete with a revamped photographic section and up-to-date developments in the history of the College. Kaylor's new edition is a 403-page softcover book tracing Juniata's achievements in education, art, science and sports over 125 years. An indispensable resource for dedicated alumni.

**"Provoking Thought:
What Colleges Should
Do for Students"**

By Leland Miles '45

Over 167 pages, Leland Miles outlines his theory of higher education learned as a Juniata undergraduate and during a distinguished academic career. As a way of explaining how colleges and universities should educate students, Miles offers a quote from Juniata's Nobel Prize winner William Phillips '70, "Juniata produces good scientists, but it also produces good people." Through personal anecdotes and diligent research, Miles makes the case for colleges to shape the minds and the personalities of students.

Dissent

Maxine Phillips '67,
Managing Editor

In the early 1950s, a small group of independent-minded radicals launched a quarterly magazine called Dissent. They were dissenting from the McCarthyite mood in America. They were dissenting from the conformism of American intellectuals. And they were dissenting from the admiration for communist totalitarianism that was widespread on the left. Dissent, edited by Mitchel Cohen and Michael Walzer, has never been tied to a political organization or party; it's a magazine for independent minds.

Visit Dissent on the web at dissentmagazine.org.

Orvis Fly Fishing Catalog

Timothy L. Achor-Hoch
'86, Art Director, Orvis
Outdoor Catalogs

If you have ever looked through an Orvis Fly fishing catalog or a Sporting Traditions Catalog (just two of about 10 different catalogs created by the Orvis company), you have seen the work of Tim Achor-Hoch. The page layout and design, many of the illustrations, photography and color reproduction are his responsibility.

The above cover shot, taken in Montana during location scouting before the "real" photo shoot began, was selected by the design team as the cover. The cover shows Tim putting Orvis products to good use.

Donna Weimer

If Donna Weimer's current life was set to its own soundtrack, one of the songs that might aptly encapsulate her career is from "Oklahoma,"

where an oft-engaged character called Ado Annie sang, albeit in a much different context, about not being able to say no.

In addition to her full teaching slate, working as ECTA department chair, advising the yearbook staff, and working on varied boards and committees outside the College, Weimer also has helped organize the College's *Celebration of Women* event, supervised the Bailey Oratorical Contest, advised the *Alfarata* yearbook and worked with students, faculty and administrators on a list of projects so varied that they literally cannot be listed because of space limitations.

"If I'm asked and it makes the student experience at Juniata richer, I have no willpower," Dr. Weimer admits with a laugh.

Recently named the Col. Sedgley and Elizabeth Bailey Thornbury Professor of Communication, Dr. Weimer shows no signs of downsizing her schedule. In reality, though, she doesn't know

any other way. She's been multitasking since graduate school, when as a single mother, she decided to earn a master's and doctoral degree at Penn State.

Now that her son, Wes Weimer, 22, is a doctoral candidate at the University of California at Berkeley, her schedule more often than not puts her on campus for 12- to 14-hour days. As Juniata's resident specialist in communication and mass media, Dr. Weimer has to keep up not only with scholarly journals and research in her field, but also with television, movies, print media, the Internet and any other component of mass communication.

A visit to Dr. Weimer's Quinter House office, crammed with books, videotapes, magazines, posters, stickie notes, a television and a computer, shows that this is a teacher who does not lack for media preparation. She subscribes to 30 general interest magazines, and watches hours of news and politics on TV. "I'm the all time greatest channel surfer," she says. "I usually watch while I'm on the computer or reading and I'll look up if I hear something interesting and tape it."

"As department chair, she is honest and forthright and she has become a mentor for the

department as well as playing the role of a mother hen," says Dr. Grace Fala, associate professor of communication.

Students who take one of her classes are guaranteed to find something interesting. She teaches such popular classes as *Rhetoric of Film*, *Truth and Lying*, *Cultural Analysis I (Identity in the Modern World)*, *Media Violence* and a new information technology course entitled, *Indiv@metaverse.com*. "It's a sophomore course that focuses on how change occurs in the technology frontier," she says.

One of the lessons Dr. Weimer discovered at the *Celebration of Women* is how deeply the College's faculty has affected students. She says attendees consistently approached her with memories of various faculty members who had made a life-changing impression on their lives as students. An Allentown native, Dr. Weimer earned all three of her degrees at Penn State and came directly to Juniata in 1990. Although many college professors typically make several moves in an academic career, Dr. Weimer knows Juniata has become part of her.

"When I plant roots they go deep," she says. "The truth is that Juniata has grown on me, or in me to be more accurate."

Kim Richardson

Cape Notes recently featured "Student Directed IT Support Services: The Juniata Model" as a Virtual Get-Together in February. Presenters included: **Anthony Bichel**, director of teaching/learning technology; **Jacob Dickerson**; **Jason Fournier**, **Tim McMichael**; **Jason Michael**; and **Joel Pheasant**, director of web technology. The presentation addressed the issue that small and medium-sized colleges and universities have traditionally had a difficult time recruiting and retaining professional instructional technology (IT) staff members. The "Juniata Model" builds on the idea that students are a welcome and necessary component to any campus technology services program and expands it by fully incorporating the students into the institutional management structure. Students working under the Teaching Learning and Technology (TLT) umbrella of services participate as full members of the organizational community.

In February, **Sarah DeHaas**, associate professor of education and her colleague, Dr. Sally Sentner from Clarion University, presented "Standards-based Assessment and Accountability:

Preparing Teacher Candidates as Advocates for All Learners" at the Association of Teacher Educators' 2001 Annual Conference in New Orleans, La.

DeHaas also presented "Unified General and Special Education Teacher Education Programs: Preparing Pre-service Teachers to Ensure that Students with Special Needs have Full Access and Opportunity to Succeed in Schools" at the conference.

Donald F. Durnbaugh, college archivist, has had an essay published in a recently released book, *The Fragmentation of the Church and Its Unity in Peacemaking*, edited by Jeffrey Gros and John D. Rempel (Grand Rapids, Mich.: William B. Eerdmans, 2001). The essay is "The Brethren Peace Witness in Ecumenical Perspective." It is adapted from a presentation at a conference at the University of Notre Dame, sponsored by the U.S. Faith and Order Commission.

Paul Heberling, professor emeritus of anthropology, will serve on the Pennsylvania Historic Preservation Board of the Pennsylvania Historical and Museum Commission.

Heberling was unanimously endorsed by the Commissioners for his knowledge and expertise in the field of historic preservation and was approved as a member by Gov. Tom Ridge.

Deb Kirchhof-Glazier was recently appointed to the Membership Committee for the National Association of Advisors for the Health Professions. She also serves as the Membership Chair for the Northeast Association of Advisors for the Health Professions and the coordinator of their Local Area Networks. On March 24, Kirchhof-Glazier attended an Open House in Naturopathic and Chiropractic Medicine at the University of Bridgeport. From March 28-April 1, she attended the joint meeting in Toronto of the Northeast Association of Advisors for the Health Professions and the Northeast Group on Student Affairs for the NE Medical Schools. She helped to plan and moderate two different sessions on Health Professions Updates, covering an array of health careers other than medicine. She also presented a poster on "HOSA: A Premier Advising Tool"; and chaired meetings of the Northeast Local Area

Roy Nagle

Network group and the Membership Committee for the Northeast Association of Advisors for the Health Professions. In April, she facilitated a Career Health Display competitive event at the State HOSA (Health Occupations Students of America) Leadership Conference.

Roy Nagle, working with Juniata student Clayton Lutz, received the Pennsylvania Quality Initiative Environmental Award for the "Map Turtle Protection and Restoration Project, State Route 522" from PennDOT. These awards are given to organizations involved in outstanding transportation projects throughout Pennsylvania. Roy's project studied methods to protect map turtles from the new Mount Union bypass on Rt. 522 while maintaining nest habitat. Nagle and Lutz have

been studying the effectiveness of that deterrent and the alternative nesting possibilities.

Kim Richardson, professor of education, has been invited to be a member of the review board for the refereed journal *Pennsylvania Reads*, published by the Keystone State Reading Association. She has also been invited by the Pennsylvania Department of Education to serve as a chair for team reviews of teacher certification programs within the state. She will be attending training sessions for chairpersons in June.

Richardson served as co-chair of the Audio Visual Committee coordinating the needs of more than 150 presenters at the Keystone State Reading Association Conference in Seven Springs, October 2000, and presented at the Early Childhood/Early Intervention Conference at Juniata College in May, 2001.

David Sowell, associate professor of history, recently presented a paper, "Scientific Medicine, State Formation, and the Development of Medical Pluralism in Colombia," to the joint meeting of the Conference on Latin American History and the American

Historical Association, Boston, January 2001. This marks the final year of his service as Chair of the Gran Colombian Committee of the Conference of Latin American History.

In February, Sowell spoke at Penn State as a part of its Latin American Studies Spring 2001 speaker series. His presentation was on "Medical Systems and Social Conflict: Healers, Ideologies, and Power in the Nineteenth Century Andes."

Jack Troy, associate professor of art, recently taught ceramics workshops for the art department at Towson University, and for the Lansing, Mich. Pottersguild. The guild purchased a wood-fired porcelain vessel of his for its permanent collection. His work is represented in the following invitational exhibitions: "Clay, Wood, Fire, Salt," Southern Highland Craft Guild Folk Art Center, Asheville, N.C.; "Ceramics Invitational," Potters Guild, Jordan, Mich.; "The Science of Craft," Craft Alliance, St. Louis, Mo.; "Shared Journeys: Chinese and American Ceramics," Winthrop University, Rock Hill, S.C.; and the University of West Virginia, Morgantown, W.Va. Troy recently taught a workshop for potters at the 92nd St. Y in New York City. He was also one of four teachers selected to teach the Spring Concentration in Ceramics at Penland School of Crafts, Penland, N.C., and his work is in the Faculty Exhibition at the school's gallery. Troy served as a juror for the Susquehanna Festival of the Arts, in Williamsport, Pa. A large wood-fired stoneware jar of Troy's was recently purchased for the permanent collection at North Carolina State University Museum of Art from the exhibition titled, "Wood/Clay/Salt/Fire," held at the Ohio Designer Craftsmen's gallery, Columbus, Ohio.

Troy and his students recently sponsored a benefit pottery sale for a Belleville, Pa., Amish child who was burned in an accident at her home.

Belle Tuten, assistant professor of history, presented "Snubbing the Pope: the Dispute Over the Priory of Pruniers, 1090-1125," at the Southeastern Medieval Association conference in

Asheville, N.C., in September 2000. An expanded version of this research, "Politics, Holiness and Property in Angers, 1080-1130," will appear in the Fall 2001 issue of *French Historical Studies*. She also presented "Women and Ordeals" at a conference titled "Conflict Resolution in Medieval Europe" at the Huntington Library, Pasadena, Calif., on April 7, 2001.

Belle Tuten

Kim Allen

UNCHARTED WATERS

"Awesome."

That's the word that Juniata College women's swimming coach Kathy Collins '92 uses to describe her three-year run as the blue and gold mentor. Quite possibly that is the lone expression that can sum up the recent success enjoyed by the fastest-rising program on the College Hill campus.

"When I took over as the swimming coach back in 1998-99, my goal was to make the team better," said Collins, who is leaving Juniata in July to pursue her doctoral degree at Bowling Green. "I wasn't sure what that was going to mean, exactly, but I wanted to be able to look at the swimming team and say that I left it in better shape than when I found it."

That she has done.

This past winter, Juniata enjoyed its finest campaign in the 13-year history of the sport. The Eagles went 9-5 in dual-meet action and posted their finest showing ever at the Middle Atlantic Conference (MAC) championship hosted by Scranton with 278 points and a fourth-place result out of the

11-team field. The previous top team performance at MACs was sixth place and 247 points, both accomplished by the 1992 club. The 1994 unit also took sixth at the conference outing. Kim Allen, who qualified for the NCAA Division III championship at MACs, earned two indi-

vidual titles (100 and 200 breaststroke). The 200- (Alissa Schneider, Jenn Dorsch, Danielle Irwin and Allen) and 400-yard medley relay (Schneider, Allen, Irwin and Cyndi Long) units were also victorious at this past winter's MAC affair. The 400 medley relay squad blew the rest of the competi-

Sitting: Cyndi Long '03, Danielle Irwin '04. Standing: Coach Kathy Collins '92, Jenn Dorsch '02, Kim Allen '04, Alissa Schneider '03

tion away and won by just under five seconds, while the 200 unit set an MAC record.

"This year's MAC championship was absolutely incredible," said Schneider, who was a member of both relay squads that placed first and was Juniata's first-ever individual champion when she won the 400-yard individual medley at the 2000 MAC meet. "Last year is when I think things really began to turn around for us at MACs. Even though we came in eighth place for the fifth straight year, we definitely became a real presence in the pool and out. We had good performances in the pool, and while that was going on the rest of the team was giving so much support that the other teams couldn't help but take notice. This year when we won the 400 medley relay by such a huge margin, you could definitely see people stand up

and take notice and at that moment teams went from liking us because we are a nice team, to respecting us in the pool as well."

The icing on the cake for the 2000-01 season came when Allen,

Cyndi Long

who went undefeated in individual events until NAAs, earned Juniata's first-ever All-American swimming honors by placing 11th in the 200-yard breaststroke.

Even a modest Allen, who always puts the performance of the team ahead of herself, admitted that she was pleased with her freshman season.

"I had set many goals for myself as a freshman collegiate swimmer," Allen said. "I wanted to place first in the MACs, make it to nationals and bring down my times all season long. I feel very fortunate to be able to say that I accomplished all of them."

Consider this. For the three years prior to the Collins era, Juniata combined to total 285 points at the MACs in those three campaigns and finished no higher than eighth. In addition, the 1995-96, 1996-97, 1997-98 team tallied an overall record of 8-28. With Collins in charge, 18 of the

program's 19 previous school records were broken.

What happened to turn things around during the Collins era?

"The biggest difference from three years ago until now is the commitment that the swimmers on the team have to the team and to improving themselves," said Dorsch.

Alissa Schneider

Senior Kara Piazza, who remembered the "tough days" more than anyone else on this year's roster added, "We have made a name for ourselves in the conference and at the school. We work hard and people know that. Kathy had the dedication and the desire to turn the program around with good recruiting and challenging practices."

"Kathy turned up the intensity of the program and our goals are now set higher for the team", Long commented. "Chris Villa has been an excellent assistant coach and he brought a lot of knowledge to the team."

Villa, who came to Juniata from Hartwick College in July of 2000, has been named the head coach of the swimming program on College Hill and will be responsible for keeping the program headed in the right direction.

"I wish all coaching staffs could have the transition that this team is going to have," said Collins.

"We put Chris in place last year as an assistant and now his move to the head coach position will be smooth. I feel very good about the shape the program is in right now and it is only going to get better. We accomplished more in three years than I ever thought possible

Danielle Irwin

and I know that there are even bigger and better things in the near future for Juniata swimming."

**The Morans – The Artistry of a Nineteenth Century Family of Painters-Etchers
Juniata College Museum of Art, Carnegie Hall Exhibit is on display through
September 15, 2001**

Comprised of 28 works (oils, watercolors, drawings, and etchings), this exhibition considers the artistic relationships among the Morans, and features landscapes, seascapes, portraits, and genre scenes by several members of the family, including Thomas Moran and his wife, Mary Nimmo Moran, Thomas' brothers, Edward and Peter, and Edward's son, Leon. Highlights include recently discovered watercolors of eastern Long Island, New Jersey, and Pennsylvania by Thomas Moran and Mary

Nimmo Moran; a previously unknown seascape by Edward Moran; and a trompe l'oeil painting by Peter Moran. All of the works on display are from the Worth B. Stottlemeyer Collection, Juniata College Museum of Art. The show will tour to other venues. The exhibition catalog by curator Nancy Siegel is available through the museum.

**Ballet Hispanico, 8:15 pm, September 29, Rosenberger Auditorium,
Oller Hall**

Recognized around the world as the foremost dance interpreter of Latino culture in the U.S., Ballet Hispanico's innovative repertory blends ballet and ethnic dance forms into a spirited image of contemporary Hispanic-American culture. Tina Ramirez, artistic director, uses both the past and the present to break new ground and strike out in exciting directions with Hispanic dance.

Reconnecting with Juniata

Chad E. Roe '96 with son, Jacob
and Dr. Robert M. Biter '92

"In the fall of 1999 my husband and I relocated to the Harrisburg, Pa. area. We are both employed at the Milton S. Hershey Medical Center, where Chad works as a nuclear medicine technologist and I am a coder in medical records. In the spring of 2000, we learned that we were expecting a child, and I made an appointment with an obstetrician who confirmed the news of my pregnancy. At one of our prenatal appointments we began discussing college. It turns out that our doctor was **Robert M. Biter '92**. He and my husband, **Chad E. Roe '96** would continue to discuss their memories of Juniata at my appointments. Our son, Jacob Eric, was born Dec. 26, 2000. Rob made a special trip to the hospital so he could deliver our son. Maybe Jacob will one day attend Juniata!"

—Jennifer Roe

"My husband Todd and I were asked to be godparents for my cousin's newborn son. We traveled the seven hours from York, Pa. to Raleigh, N.C. to stay at her home the weekend of April 1, 2001. That Sunday, at St. Philip Lutheran Church, we met the pastor just before the service to discuss the baptism. During the conversation, I was surprised to learn that Pastor **David J. Amidon '75** was a fellow Juniatian! Pastor Amidon and I shared several fond memories of our years at Juniata. Even though the tradition of the Raft Regatta was gone during my Juniata years, I was delighted to learn that David not only participated, but won! Pastor Amidon and his wife Diane, the associate pastor, led the worship and baptized our godson that special day. I wanted to share that moment and thank David and Diane for making us feel so welcome in their parish."

—Michelle (Crist) Barnhart '91

"When I wrote to **Jodie (Monger) Gray '88** in answer to her request for information about what alums are doing, I figured no one would take notice to the information. Was I ever surprised when a phone call came! A young lady called and identified herself and began to talk about reading my "story" on the Internet. She quickly identified herself as a Juniata grad — **Kristel (Lasher) Wisor '98** — it was then, with interest, that I continued to listen to her request. She told me that she had been hired after graduation to participate in "Communities in Schools to the Laurel Highlands." Her duties involve finding people who will talk to schoolchildren about their careers, and she asked me to be an "Artist in Residence." On Jan. 23 and 25, 2001, I spoke with fourth and fifth graders about my work — what a delight it was to be there! I encourage all alums to write in to the college...one never knows where their "story" will lead them. I wouldn't trade those two days with the children for anything!"

—Marilyn (Mitchell) Shaw '89

Juniata Trivia

1. What was the land called located between Washington and Moore Streets extending from 21st Avenue?
2. How many students went to Trough Creek to avoid the Smallpox epidemic in 1878?
3. What modern convenience was not included in the construction of the original Founders Hall?
4. What are the names of the two galleries located in the Juniata College Museum of Art?
5. Juniata College's Special Collections includes 20 copies of the first Bible published in any European language in the American colonies. Under what name is it known?
6. How many consecutive MAC championships has the women's volleyball team won?
7. When was the last time Juniata's football team appeared in a bowl game?
8. When was the first All Class Night?
9. Who was the only Juniata College president to serve two separate terms?
10. During which decade was the traditional Madrigal Dinner established?

Winter 2001 Deja View

Two Juniata students who are actually depicted in the photo responded to this Deja View challenge! Eula (Guthrie) Fyock '31 (third from left) and Esther Kunsman Steele '32 (second from left) both vividly remember being photographed with their Home Economics classmates during the 1930 fall semester. Pictured with them (far left) is Leona Stouffer '31, Gertrude Butler '31, who later served as assistant professor of home economics (next to carriage on the right), and (far right) Marie Pentz '31. Both Eula and Esther explained that the group took care of the baby boy named Bobby for a period of time (day and night!) in the Home Management House as part of their child-care course.
